DETAILED ACTION

Response to Amendment

1. Applicant's amendment and remarks received 08 August 2005 have been entered and overcome the objections and 112 rejections cited in the previous office action.

Allowable Subject Matter

2. Claims 1-6 are allowed.

3. The following is an examiner's statement of reasons for allowance: Applicant argues that the applied prior art (Fushimi) does not teach or suggest the claimed relationships between the distances of the components. Applicant's arguments are persuasive.

4. Thus, regarding independent claim 1, the prior art of record neither shows or suggests an electron beam apparatus comprising, in addition to other limitations of the claim, a distance (D1) between a portion of a potential specifying plate between one opening of a plurality of openings of the potential specifying plate near the spacer and the spacer and an electron beam irradiation member and a distance (D2) between a portion of the potential specifying plate between the one opening of the potential specifying plate near the spacer and another opening of the plurality of openings of the potential specifying plate not near the spacer and the electron beam irradiation member satisfying a relationship $D1 < D2$. Due to their dependency upon independent claim 1, claims 3 and 5 are also allowable.

5. Regarding independent claim 2, the prior art of record neither shows or suggests an electron beam apparatus comprising, in addition to other limitations of the claim, a distance (D3) between a portion of a potential specifying plate between one opening of a plurality of openings of the potential specifying plate near the spacer and the spacer and an electron-emitting device and a distance (D4) between a portion of the potential specifying plate between the one opening of the potential specifying plate near the spacer and another opening of the plurality of openings of the potential specifying plate not near the spacer and the electron-emitting device satisfying a relationship $D3 > D4$. Due to their dependency upon independent claim 2, claims 4 and 6 are also allowable.
6. The structure described earlier is provided for producing a high brightness and high quality image. The design is new and unique to the art.
7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
